JAD Environmental Wins Department of Energy NEPA Contract

Richland, Wash. – The JAD Environmental Team was selected by the U.S. Department of Energy (DOE) to provide National Environmental Policy Act (NEPA) support services across the DOE weapons complex. Specifically, the team will support the Department's preparation of environmental impact statements, environmental assessments, and environmental reports in compliance with NEPA.

The JAD Environmental Team is led by a new joint venture, JAD Environmental, LLC, which was formed to provide the breadth and depth of experiences and resources needed for this important environmental contract. JAD Environmental, LLC, is comprised of Jason Associates Corporation (San Diego, Calif.), AGEISS, Inc. (Evergreen, Colo.), and Dade Moeller & Associates (Richland, Wash.). The team is rounded out by several experienced and specialized subcontractors with in-depth DOE site experience.

JAD Environmental represents more than 50 years of combined experience in preparing and reviewing NEPA evaluations, and more than 40 years experience in supporting NEPA evaluations specifically for DOE. The JAD Team employs seasoned program, project, and task managers; technical leads; subject matter experts; project controls personnel; and administrative personnel with experience working on NEPA evaluations with a variety of Federal government agencies, state agencies, the Nuclear Regulatory Commission, nuclear utilities, and international clients.

For further information on the capabilities and experience of JAD Environmental, please visit our website, www.jadenvironmental.com.

NEPA is a United States environmental law that was signed into law on January 1, 1970, by President Richard Nixon. NEPA requires all federal government agencies to prepare environmental assessments and environmental impact statements regarding the potential environmental effects of proposed federal agency actions.
